

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended)An electronic device comprising a main body, and a fuel cell having a first surface for taking in air and a second surface for taking in air and formed in an opposite side to the first surface, wherein when the fuel cell stops supplying power to the main body, the ~~fixed-first~~ surface is in ~~one~~ a power stop state facing the main body, and wherein when the fuel cell supplies power to the main body, the first surface moves to a second-power start state remote from the main body as compared with the first power stop state.

2. (previously presented)An electronic device according to Claim 1, wherein the fuel cell is detachable from the main body.

Claims 3 and 4 (canceled)

5. (previously presented)An electronic device according to Claim 1, wherein the fuel cell has a fuel tank which supplies fuel, and a power generation portion panel having the first surface and the second surface, wherein when the main body is supplied with power, the fuel cell includes the power generation portion panel.

Claims 6 and 7 (canceled)

8. (previously presented)An electronic device according to Claim 1, wherein a space between the fuel cell and the main body at a time when the fuel cell supplies power to the main body is larger than the space between the fuel cell and the main body at a time when the fuel cell stops supplying power to the main body.

9. (previously presented)An electronic device according to Claim 1, wherein the fuel cell has a fuel tank supplying fuel and a power generation portion panel having the first surface and the second surface, and wherein the fuel is supplied from the fuel tank to the power generation portion panel when a power supply of the main body is turned on.

10. (previously presented)An electronic device according to Claim 1, wherein the fuel cell has a fuel tank supplying fuel and a power generation portion panel having the first surface and the second surface, and wherein the supply of fuel from the fuel tank to the power generation portion panel is stopped when a power supply of the main body is turned off.

Claims 11 - 17 (canceled)
